

Doaa Mahmoud Abdelmagid

Frontend Developer

doaamahmoud.dm2017@gmail.com | www.linkedin.com/in/doaa-mahmoud-426170224

Egypt | +201092378809

Enthusiastic and quick-to-learn professional with a background in Customer Service and a passion for web development. Currently transitioning into the frontend development field, with hands-on experience in HTML, CSS, JavaScript and React js. Demonstrated ability to problem-solve, collaborate in team settings, and learn new technologies rapidly. to build engaging and user-friendly web applications

Projects

React Portfolio Website

Present

This project showcases a personal portfolio website where I present my web development skills and projects. The website is built using a combination of HTML5, CSS3, JavaScript, and React, aiming to provide a clean and interactive user experience.

Restaurant Website

Present

This project is a fully functional website designed for a restaurant, built using HTML, CSS, JavaScript, and React. The goal was to create an engaging, user-friendly platform where customers can explore the restaurant's menu, view the ambiance, and easily make reservations

Courses Website

Present

This project is a fully functional Online Courses Website designed to provide users with an easy-to-navigate platform to browse, register, and learn from a wide variety of online courses. Built with HTML and CSS, the website offers a dynamic and engaging user experience for both students and instructors.
